Our potential risks and uncertainties are presented in the section titled “Item 1A. Risk Factors” disclosed in our Annual Report on Form 10-K for the year ended December 31, 2015. The following are some of the risks and uncertainties, although not all risks and uncertainties, that could cause our actual results to differ materially from those presented in our forward looking statements:

- Certain of our executive officers and directors are also officers, managers or holders of a direct or indirect controlling interest in our advisor, Healthcare Trust Advisors, LLC (the "Advisor"), formerly known as American Realty Capital Healthcare II Advisors, LLC, and other entities affiliated with AR Global Investments, LLC (the successor business to AR Capital, LLC, "AR Global"), the parent of our sponsor, American Realty Capital VII, LLC. As a result, certain of our executive officers and directors, our Advisor and its affiliates face conflicts of interest, including significant conflicts created by our Advisor’s compensation arrangements with us and other investment programs advised by affiliates of AR Global and conflicts in allocating time among these investment programs and us. These conflicts could result in unanticipated actions.

- Because investment opportunities that are suitable for us may also be suitable for other investment programs advised by affiliates of AR Global, our Advisor and its affiliates face conflicts of interest relating to the purchase of properties and other investments and such conflicts may not be resolved in our favor, meaning that we could invest in less attractive assets, which could reduce the investment return to our stockholders.

- Although we intend to list our shares of common stock on a national stock exchange when we believe market conditions are favorable to do so, there is no assurance that our shares of common stock will be listed. No public market currently exists, or may ever exist, for shares of our common stock and our shares are, and may continue to be, illiquid.

- We focus on acquiring a diversified portfolio of healthcare-related assets located in the United States and are subject to risks inherent in concentrating investments in the healthcare industry.

- If our Advisor loses or is unable to obtain qualified personnel, our ability to implement our investment strategies could be delayed or hindered.

- The healthcare industry is heavily regulated, and new laws or regulations, changes to existing laws or regulations, loss of licensure or failure to obtain licensure could result in the inability of tenants to make lease payments to us.

- We are depending on our Advisor to select investments and conduct our operations. Adverse changes in the financial condition of our Advisor or our relationship with our Advisor could adversely affect us.

- We may be unable to pay distributions with cash flows from operations, or maintain cash distributions or increase distributions over time.
Risk Factors (cont’d)

• We are obligated to pay fees, which may be substantial, to our Advisor and its affiliates.
• We depend on tenants for our revenue and, accordingly, our revenue is dependent upon the success and economic viability of our tenants.
• We may not be able to achieve our rental rate objectives on new and renewal leases and our expenses could be greater, which may impact our results of operations.
• Increases in interest rates could increase the amount of our debt payments and limit our ability to pay distributions.
• We are permitted to pay distributions of unlimited amounts from any source. There are no established limits on the amount of borrowings that we may use to fund distribution payments, except for those imposed by Maryland law.
• Any distributions, especially those not covered by our cash flows from operations, may reduce the amount of capital we ultimately invest in properties and other permitted investments and negatively impact the value of our stockholders’ investment.
• We have not and may not in the future generate cash flows sufficient to pay our distributions to stockholders and, as such, we may be required to fund distributions from borrowings, which may be at unfavorable rates and could restrict the amount we can borrow for investments and other purposes, or depend on our Advisor or our property manager, Healthcare Trust Properties, LLC, formerly known as American Realty Capital Healthcare II Properties, LLC, to waive fees or reimbursement of certain expenses and fees to fund our operations. There is no assurance these entities will waive such amounts or that we will be able to borrow funds at all.
• We are subject to risks associated with any dislocations or liquidity disruptions that may exist or occur in the credit markets of the United States from time to time.
• We are subject to risks associated with changes in general economic, business and political conditions including the possibility of intensified international hostilities, acts of terrorism, and changes in conditions of United States or international lending, capital and financing markets.
• We may fail to continue to qualify to be treated as a REIT, which would result in higher taxes, may adversely affect our operations and would reduce the value of an investment in our common stock and the cash available for distributions.
• We may be deemed to be an investment company under the Investment Company Act of 1940, as amended (the "Investment Company Act"), and thus subject to regulation under the Investment Company Act.
• Commencing with the day we publish a net asset value ("NAV"), anticipated on or prior to April 11, 2016, the offering price and repurchase price for our shares, including shares sold pursuant to our DRIP will be based on NAV, which may not accurately reflect the value of our assets and may not represent what stockholders may receive upon a liquidation of our assets.
